

Mauro Lepore

Software developer / data scientist

maurolepore@gmail.com, +1 346 773 2738, Washington DC

I'm most experienced in software development, teaching/mentoring and research. I implement software solutions to help researchers work in an efficient, transparent, and reproducible way. I created and maintain a number of R packages now hosted on GitHub and CRAN. I often contribute as a developer or teacher to popular open software projects or communities (<https://maurolepore.github.io/>).
